

Rosicrucian cycles

The following tables show the Cycles used to assign the Arcana and the planetary and zodiac symbols to draft an esoteric-onomantic horoscope based on the numerical values derived from the birth data.

The tables proposed by the two authors exhibit no significant differences, barring the terminologies used in the descriptions of the Arcana and some minor variations. In the original works, each Cycle corresponds to a table assigned to one of the classical planets. The only differences between various Cycles are found in the planet-zodiac sign assignments. For convenience, we have opted for a single table comprising the data for all the cycles.

Key

Both authors share the same attributions for the columns and uncoloured fields.

Cycle of Major Arcana

In the Cycle of Major Arcana, which is standard across all tables, a sole disparity exists regarding the planet attributed to the number 200, which for ADB corresponds to Mercury and for PC to Saturn.

Cycles di Jupiter (Zachariel), Moon (Gabriel), Venus (Anael), Mars (Samael), Saturn (Orphiel), Sun (Michael), Mercury (Raphael)

Each cycle corresponds to a planet, which can be found in the second row of the table, denoted by the number 5 and the Queen. When performing horoscope calculations that require a specific planetary cycle, refer to the cited line to identify the respective cycle. For instance, when using the Venus cycle, locate the Venus glyph to identify the column that corresponds to the planets to be utilised in the calculations.
